Geneva Workshop 2016

Introduction to WHO Library information resources

- **Contact the Library and Reference Desk**

Monday to Friday 9:00 to 12:00 (Closed 12:00 to 14:00) 14:00 to 16:00

(Library Staff extend opening hours depending on the work schedule)

Book and periodical collection available 24/7 with WHO / UNAIDS staff - intern - consultant badges with "magnetic badge"

Tel.: extension 12062

E-mail: LNK@who.int

Internet: <http://www.who.int/library>

Intranet: <http://intranet.who.int/homes/lnk>.

- **Ask about WHO Library briefing for external visiting groups**

- 30, 45 or 60 minutes focused on the subject area/interests of the group –

WHO publications online

<http://www.who.int/publications/en/>

Key WHO publications

The World Health Report
Annual report with an expert assessment of global health including statistics. Focuses on a particular theme every year.

World Health Statistics
WHO's annual compilation of data from its 193 Member States.

International Travel and Health
Publication on health risks for international travellers, vaccination requirements and precautions to take.

International Health Regulations
Latest edition of the public health regulations that are legally binding on WHO Member States.

The International Classification of Diseases
The international standard diagnostic classification for epidemiological and health management purposes.

International Pharmacopoeia
Collection of quality specifications for pharmaceutical substances and dosage forms, for reference or adaptation by WHO Member States.

Journals

Bulletin of the World Health Organization
Monthly journal with peer-reviewed papers. Focus on developing countries.

 **Eastern Mediterranean Health Journal**
Published by the WHO Regional Office for the Eastern Mediterranean. Focus on policies and research in the region.

 **Pan American Journal of Public Health**
Published by the Pan American Health Organization (PAHO) in English, Portuguese and Spanish. Contains technical and analytical papers.

Weekly Epidemiological Record
Epidemiological information on cases and outbreaks of communicable diseases.

 **Western Pacific Surveillance and Response**
Published by the WHO Regional Office for the Western Pacific. Dedicated to the surveillance of and response to public health events.

WHO Drug Information
Quarterly journal on topics relating to medicines development and regulation.

Library and Documentation Centre

The WHO Regional Office for Africa (AFRO) Health Sciences Library and Documentation Centre (HSLDC) is a leading provider of health information services in the African Region. It is a member of the International Association of Agricultural Librarians and Documentalists (IAALD) and the International Association of Health Librarians and Documentalists (IAHLID).

African Index Medicus

Access to African Health Information

English | Français | Português

African Index Medicus (AIM)

In order to give access to information published in or related to Africa and to encourage local publishing, the World Health Organization, in collaboration with the [International Association of Agricultural Librarians and Documentalists \(IAALD\)](#), has produced an international index to African health literature and information sources. This index is called African Index Medicus (AIM).

[access the database](#)

Why Index African Literature?

The need for improved access to what has been published on health issues in African countries has long been felt by researchers, development agencies, health administrators and planners both inside and outside the continent. Very few African health and biomedical information sources are included in the world's leading bibliographic databases and there is a wealth of untapped information in books, reports and studies from international development agencies, nongovernmental organizations and local institutions.

Only by awareness of what work has already been done, can further advances be made: giving visibility to locally published material avoids overlapping, conflicting or redundant research work or the unnecessary duplication of health learning materials; new studies would then build on earlier reports of projects or research already undertaken. This would reduce costs of duplicated efforts, improve in methodology earlier used and make research more cost-effective and original.

Printed knowledge generated in African countries is given global exposure in the African Index Medicus. It will promote African publishing by encouraging writers to publish in their country or regional journals, whereas now scientists and researchers in developing countries are competing for publication space in the few world-wide "prestigious" journals.

The traditional North-South flow of information could be complemented by South-South and South-South communication: information on health problems in one country will be shared with those experiencing similar conditions.

Institutional Repository for Information Sharing (IRIS)

<http://apps.who.int/iris/>

The screenshot shows the WHO IRIS website interface. At the top, there is a navigation bar with the WHO logo and 'World Health Organization' text on the left, and language options (español, русский, français, English, 中文, العربية) on the right. Below the language options is a search bar and an 'Advanced Search' link. The main content area is divided into several sections:

- WHO IRIS**: A header section.
- Home**: A navigation link.
- Browse**: A section with filters for Issue Date, Author, Title, Subject, and Communities & Collections.
- Recent Submissions**: A section featuring two items:
 - Item 1**: "An annotated bibliography of scientific studies done on tobacco topic in WHO South-East Asia Region countries 2003-2014". The description states: "This report is a compilation of abstracts of a few published and unpublished research studies on tobacco done from 2003 to 2014 in countries of the WHO South-East Asia Region. The purpose of creating this comprehensive database is to create a pool of information at one&#x..."
 - Item 2**: "Country Profiles on implementation of the WHO Framework Convention on Tobacco Control in the WHO South-East Asia Region". The description states: "WHO South-East Asia Region (SEAR) is home to about one fourth of the world's population. Studies show that more than half of adult males and nearly two in ten adult females use tobacco in one form or another. There are wide-ranging differences among countries ..."
- Help**: A navigation link.
- Related links**: A section with a link to "PAHO IRIS".
- RSS Feeds**: A section with RSS 1.0, RSS 2.0, and RSS buttons.
- Refine your search**: A section with a list of authors and their corresponding counts:
 - World Health Organization: 18494
 - Pan American Health Organization: 3452
 - World Health Organization, Region...: 3209
 - Organización Panamericana de la S...: 1450
 - World Health Organization. Region...: 1392
 - Всемирная организация: 883

IRIS

<http://apps.who.int/iris/>

- WHO collective memory, provides over 170 000 bibliographic records
 - WHO publications 1948–
 - articles in WHO periodicals
 - articles in outside periodicals on WHO work
 - technical documents (unrestricted) 1986–
 - governing body documents
 - press and audiovisual materials
 - historical materials.

IRIS

<http://apps.who.int/iris/>

- WHO document dissemination, provides over **150,000** full-text links to:
 - technical documents (unrestricted), headquarters and regional offices, 1986–
 - articles in the *Bulletin of the World Health Organization*, 1947–
 - *Weekly Epidemiological Record*, 1926–
 - press materials
 - WHO out-of-print publications (in process)
 - historical resources.

Academic Search Premier

Multidisciplinary & embedded PDFs

The screenshot displays the Academic Search Premier interface. At the top, a navigation bar includes links for 'New Search', 'Publications', 'Subject Terms', 'Cited References', and 'More'. It also features a 'Sign In to My EBSCOhost' button, a 'Folder' icon, and links for 'New Features!', 'Help', and 'Exit'. Below this, the search criteria 'Academic Search Premier' and 'WORLD HEALTH ORGANIZATION' are visible. The main content area shows a PDF viewer for a document from the 'Journal of Community Health, Vol. 30, No. 3, June 2005 (© 2005)'. The document title is 'HOW DO WE DETERMINE WHETHER COMMUNITY HEALTH WORKERS ARE COST-EFFECTIVE? SOME CORE METHODOLOGICAL ISSUES' by Damian G. Walker, MSc; Stephen Jan, PhD. The abstract begins with 'ABSTRACT: Since the Alma-Ata Conference in 1978 reiterated the goal of "Health for All by the Year 2000" health service delivery programs...'. The interface includes a toolbar with various icons for navigation and a sidebar with 'Pages', 'Attachments', and 'Comments' sections. At the bottom, there are options to 'Add to folder', 'Times Cited in this Database: (2)', and a 'Display results: Brief 10 per page' dropdown menu.

Clinical Evidence – BMJ Evidence-Based Medicine

The screenshot displays the Clinical Evidence website interface. At the top, there is a navigation bar with links for Home, Log out, Help, and Contact us. Below this is the main header with the 'Clinical Evidence' logo and a search bar. The main content area is divided into several sections:

- Conditions:** A list of conditions with 'Tuberculosis in people with HIV' selected. Other visible conditions include Panic disorder, Wrinkles, Raynaud's (primary), COPD, and Fungal toenail infections.
- Interventions:** A list of interventions related to the selected condition, including 'Pos prev', 'Deli suic', 'Chro', and 'Acu'.
- Key points:** A section containing text about the guidelines, stating they are sourced from the National Guidelines Clearinghouse in the USA, NICE in the UK, and other international government sources.
- About this condition:** A section with a link to 'Tuberculosis: clinical diagnosis and management of tuberculosis, and measures for its prevention and control'.
- Updates (2):** A section with a link to 'Standards for HIV clinical care'.
- Guidelines (7):** A section with a link to 'Policy guidelines for collaborative TB and HIV services for injecting and other drug users: an integrated approach'.

On the right side of the page, there are sections for 'Email Alerts' (with links for 'updates via RSS' and 'mail alerts') and 'Evidence Userguide' (with a link to 'The Clinical Evidence Userguide, available in over a dozen languages (now including Finnish), features illustrations and examples of how to get the most out of our site.').

Global Health Database

Zoonotic, historical & grey literature

The screenshot shows the CAB Direct website interface. At the top left is the 'cabdirect' logo. Below it are navigation links: 'About CAB Direct | Tell us what you think | Contact Us'. A green navigation bar contains 'Home', 'Help', and 'Thesaurus' buttons. On the right, a light blue box states: 'Over 8 million bibliographic and full text applied life science articles hand picked by our team of experts and updated daily.' The main content area is titled 'Advanced search:' and features three search rows, each with an empty text input, an 'in' label, and a dropdown menu set to 'All fields'. Below these is an 'Add Row' button. On the left side, there is a 'Subscription Information' section with a 'Log Out' button and a link to 'Log into a different account'. Below that is a 'MyCABDirect' section with links for 'About MyCABDirect' and 'Create a free account'. At the bottom of the search area, there are filters for 'Published between' (with 'yyyy' input fields), 'Added since' (with 'yyyy-mm-dd' input and a calendar icon), 'Language' (with a dropdown set to 'Any Language'), and 'Document type' (with a dropdown set to 'All Types'). A 'Submit' button with a right-pointing arrow is located to the right of the 'Add Row' button.

POPLINE – Reproductive health & Open Access

The screenshot shows the POPLINE website interface. At the top left is the POPLINE logo, which includes a magnifying glass icon and the text "POPLINE by Health". To the right of the logo are links for "KEYWORD GUIDE" and "TRANSLATE". Below these are "REGISTER" and "SIGN IN" buttons. A navigation bar contains links for "Advanced Search", "Subjects", "Services", "About", and "Help". On the right side of the navigation bar are "MY BASKET" and "MY DOCUMENTS" icons. The main content area is split into two columns. The left column has a dark grey header with "Welcome to POPLINE" and a sub-header stating "POPLINE provides access to 370,000 carefully selected publications and resources related to family planning and reproductive health". Below this is a search bar with a green "Search" button. At the bottom of the left column are three icons with labels: "GETTING STARTED", "ORDER DOCUMENTS", and "SUGGEST NEW ADDITIONS". The right column has a blue header with the text "Search and research the world's reproductive health literature." Below this is a blue box containing the text "207 new records added on January 24, 2014." At the bottom of the right column is a section titled "POPLINE Subjects" with a list of subjects: Adolescent Reproductive Health, Family Planning Methods, Family Planning Programs, Gender, and Health Communication.

Sanitation and Externalities: Evidence from Early Childhood Health in Rural India

Authors: Luis A. Andres, Bertha Briceño, Claire Chase and Juan A. Echenique

Published: January 2014 Pages: 39

Complete Book PDF (523KB)

Abstract:

This paper estimates two sources of benefits related to sanitation infrastructure access on early childhood health: a direct benefit a household receives when moving from open to fixed-point defecation or from unimproved sanitation to improved sanitation, and an external benefit (externality) produced by the neighborhood's access to sanitation infrastructure. The paper uses a sample of children under 48 months in rural areas of India from the Third Round of District Level Household Survey 2007–08 and finds evidence of positive and significant direct benefits and concave positive external effects for both improved sanitation and fixed-point defecation. There is a 47 percent reduction in diarrhea prevalence between children living in a household without access to improved sanitation in a village without coverage of improved sanitation and children living in a household with access to improved sanitation in a village with complete coverage. One-fourth of this benefit is due to the direct benefit leaving the rest to external gains. Finally, all the benefits from eliminating open defecation come from improved sanitation and not other sanitation solutions.

Finding the full text

- Basic Rules.
- Full text articles have many "homes on the internet".
- PubMed is NOT the best indicator of full text access.
- Paper journals are important.
- Try to maximize resources (U de Genève, Free Medical Journals, ILO, etc).
- See that Handout "7 Simple Steps to Full Text".

MEDLINE database

<http://pubmed.gov>

- National Library of Medicine (USA).
- A bibliographic database containing more than 26 million references.
- Indexes over 5500 biomedical journals; coverage is worldwide, but (86%) of the records are from English-language resources.
- Covers medicine, nursing, dentistry, veterinary medicine, health-care systems and the pre-clinical sciences, as well as microbiology, delivery of health care, nutrition, pharmacology and environmental health.
- New material is added and the database is updated weekly.

Web of Science

- Coverage

- 6034 major science journals across 150 disciplines
- 1764 social science journals across 50 disciplines
- 1121 journals in the arts and humanities.

- Why use the Web of Science?

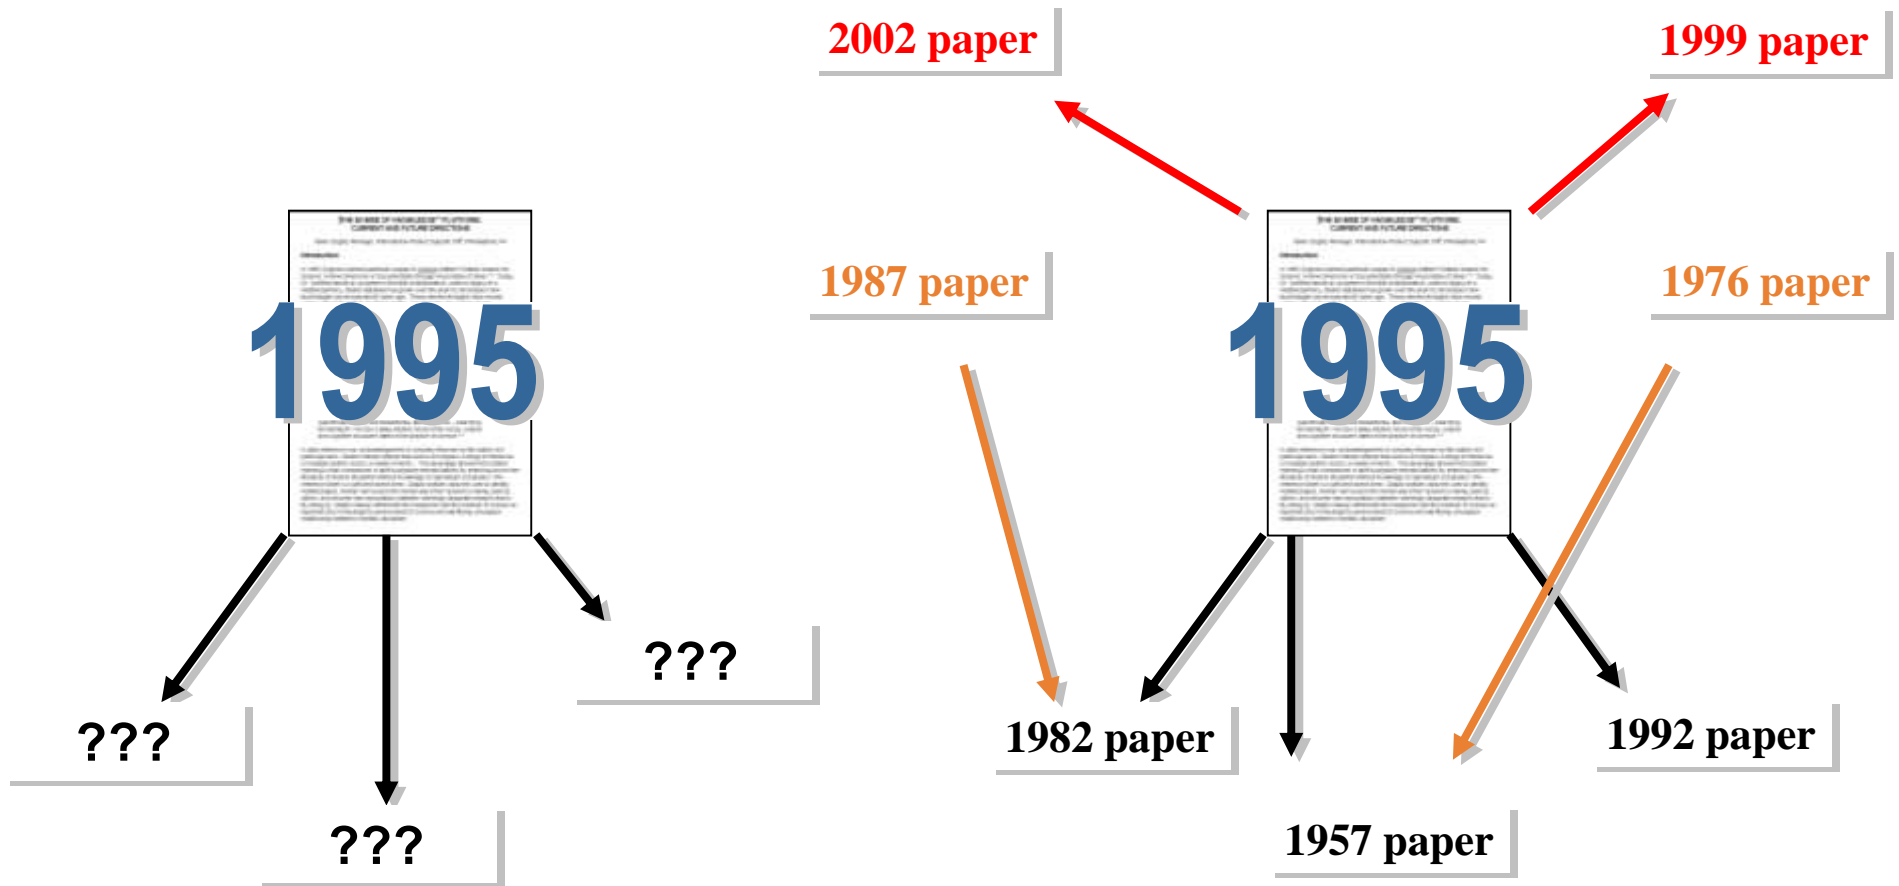

- for research in health as a broad concept
- interdisciplinary research
- research outside the domain of health.

Global Index Medicus (GIM)

New Global Index Medicus

<http://www.globalhealthlibrary.net/php/index.php>

The screenshot shows the WHO Global Health Library search interface. At the top left is the WHO logo and the text "World Health Organization". To the right, it says "Global Health Library". In the top right corner, there are language options: "português" and "español". Below the header is a search bar with the placeholder text "Enter one or more words". To the right of the search bar is a dropdown menu set to "All indexes" and a "where:" dropdown menu set to "Regional Indexes". A "search" button is located to the right of the "where:" dropdown. Below the search bar, there are links for "Export RIS", "RSS", and "XML". A dropdown menu is open from the "Regional Indexes" dropdown, showing a list of sources: "All sources", "Regional Indexes", "AIM (AFRO)", "LILACS (AMRO/PAHO)", "IMEMR (EMRO)", "IMSEAR (SEARO)", "WPRIM (WPRO)", "Global Index", "MEDLINE", and "WHOLIS (KMS)". On the left side, there is a sidebar with "GHL > Search" and a "Search history (0)" section. Below that, there is a "Refine your search" section with a "Region" filter. The "Region" filter is expanded, showing a list of regions with their respective counts: "South-East Asia (124701)", "Eastern Mediterranean (89508)", "Europe (1682)", "Africa (1410)", and "Western Pacific (106)". The main content area shows search results for "1-15 de 956.486". The first result is "1. Implementation of user-charges in Mukono." with author(s) "Nabembezi, J.S; Magyezi, R.T; Namuyomba, M.", source "Tropical Health;4(2)(199. . .", and subject(s) "HEALTH CARE COST^0x Community Health Services". The second result is "2. Experience with the integrated services in the control of the spread of HIV/AIDS at th Uganda AIDS Information Centre." with author(s) "Rwandembo, Mugisha, Wilson." and source "Tropical Health;4(2)(199. . .".

WHO Library supporting access to health information

- HINARI
- Support to AGORA \ OARE\ ARDI
- Reproductive Health Library
- Global Health Library.

- Launch date January 2002 for “free access” countries; launch to “low-cost countries” January 2003
- More than 180 publishers providing over 15 000 health related online journals and more than 47 0000 online books to low- and middle-income countries at zero or low cost
- Available a to academic, government, research institutions and teaching hospitals in 117 countries, areas and territories
- Country eligibility based on GNI and development indicators

Hinari : <http://www.who.int/hinari> hinari@who.int

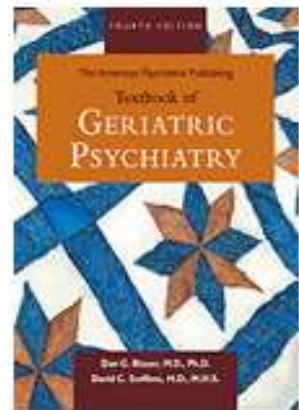

The screenshot shows the HINARI website interface. At the top right, there are language options: عربي, 中文, English, Français, Русский, and Español. The HINARI logo is on the left, with the tagline "Research in Health". A search bar and a "Search" button are in the center. A "Login to HINARI" button is on the right. A left sidebar contains a menu with items: HINARI, About HINARI, Access the content, Eligibility, Partners, Training materials, Promoting HINARI, and Contributions. The main content area features a section titled "HINARI Access to Research in Health Programme" with a detailed description of the program's scope and a link to a "Map of country breakdown 2016" (png, 121kb). Below this are two columns: "News" with two items and "New Partners since July 2015" with a list of partners including Addleton Academic Publishers and Directory of Open Access Journals (DOAJ). On the right, there are sections for "Give to HINARI", "Portuguese HINARI website", and "Other Sister Programmes with" which includes logos for research4life and GORA (Research in Agriculture).

Access to Global Online Research in Agriculture (AGORA)

- Launched by FAO in October 2003.
- The agriculture "sister" initiative (or version) of Hinari.
- Hinari and AGORA work closely together on content, online systems, administration, training and promotion.
- Local not-for-profit institutions in the same 117 countries, areas and territories with online access up to 5900 journals and 6400 books.
- Main partners: publishers, Cornell University (Mann Library), STM.
- Web site: <http://www.fao.org/agora>

Online Access to Research in the Environment (OARE)

<http://www.unep.org/oare>

- Launched by UNEP and Yale University in October 2006. OARE is the environment "sister" programme (or version) of Hinari.
- Up to 10 000 scientific journals and 20 000 books from 120 publishers, available online in the same 117 low- and middle-income countries, areas and territories.
- Publications are provided in a wide range of disciplines:
 - Biotechnology, climate change, environmental economics, engineering, law and policy, toxicology and pollution, zoology, and many others

Access to Research and Development for Innovation (ARDI) <http://www.wipo.int/ardi>

- Launched by WIPO in 2009 and joined Research4Life in 2011. ARDI is the applied sciences "sister" programme (or version) of Hinari.
- Up to 8400 scientific journals and 19 000 books from 40 publishers, available online in the same 117 low- and middle-income countries, areas and territories.
- A special focus on generating new innovation and patentable ideas in the developing world

Sponsoring an institution in Hinari Group B countries with US\$ 1500 Subscription

- Access to over 2,000 online priced journals for 12 months.
- Cost is less than 50 cents per title.
- Online subscription to Lancet, US\$ 200 value.
- Once an institution has had a year's access to , local administrators and faculty realise the usefulness of Hinari and the financial savings. 2nd and following years are often then locally funded.

HINARI, AGORA, OARE & ARDI

www.Research4Life.org

Welcome to the **Research4Life** webpages. These pages will be built up as a central resource for journalists, researchers, students and the general public who are interested in the three Research4Life programs (HINARI, AGORA and OARE) that are a key source of scientific information in the areas of health, agriculture and the environment for developing countries.

The **Research4Life** programs are unique, cooperative public-private partnerships (PPPs) between UN agencies, STM publishers, universities and university libraries, philanthropic foundations and technology partners.
