World Health Organization

WHO publications online

Key WHO publications

The World Health Report
Annual report with an expert assessment of global health including statistics. Focuses on a particular theme every year.

World Health Statistics
WHO's annual compilation of data from its 193 Member States.

International Travel and Health
Publication on health risks for international travellers, vaccination requirements and precautions to take.

International Health Regulations
Latest edition of the public health regulations that are legally binding on WHO Member States.

The International Classification of Diseases
The international standard diagnostic classification for epidemiological and health management purposes.

International Pharmacopoeia
Collection of quality specifications for pharmaceutical substances and dosage forms, for reference or adaptation by WHO Member States.

Journals

Bulletin of the World Health Organization
Monthly journal with peer-reviewed papers. Focus on developing countries.

Eastern Mediterranean Health Journal
Published by the WHO Regional Office for the Eastern Mediterranean. Focus on policies and research in the region.

Pan American Journal of Public Health
Published by the Pan American Health Organization (PAHO) in English, Portuguese and Spanish. Contains technical and analytical papers.

Weekly Epidemiological Record
Epidemiological information on cases and outbreaks of communicable diseases.

Western Pacific Surveillance and Response
Published by the WHO Regional Office for the Western Pacific. Dedicated to the surveillance of and response to public health events.

WHO Drug Information
Quarterly journal on topics relating to medicines development and regulation.

World Health Organization

COLLABORATING CENTRES

Fact sheet

Over 900 institutions...

...in almost 100 countries...

...supporting WHO programmes

The World Health Organization requires expert advice for overall scientific and technical guidance, as well as for

Eligibility and criteria for designation

An entire institution or, in most cases, a department, division or laboratory within an institution may be designated as a centre. Typical examples of WHO Collaborating Centres are departments of universities, laboratories or divisions of national research institutes, departments of hospitals, departments of ministries, national academies, etc.

WHO Collaborating Centres

services including promotive, preventive, curative and rehabilitative/compensation aspects.
5. To explore the burden of occupational and environmental disease, their social determinants and strategies for their prevention amongst vulnerabl
Southern Africa, with a view to advancing equity in health
6. To foster inter-institutional research, teaching and service (including outreach)
7. To foster local and global networks for occupational and environmental health promotion through collaboration with United Nations and other agen
8. To implement the results of research in teaching, training, policy, service provision and outreach

Subjects:
1. Occupational health

Types of activity:
1. Implementation of WHO programmes and activities at country level
2. Research

WHO organization wide expected result:
8.3: Technical assistance and support provided to Member States for strengthening national occupational and environmental health risk management
functions and services.

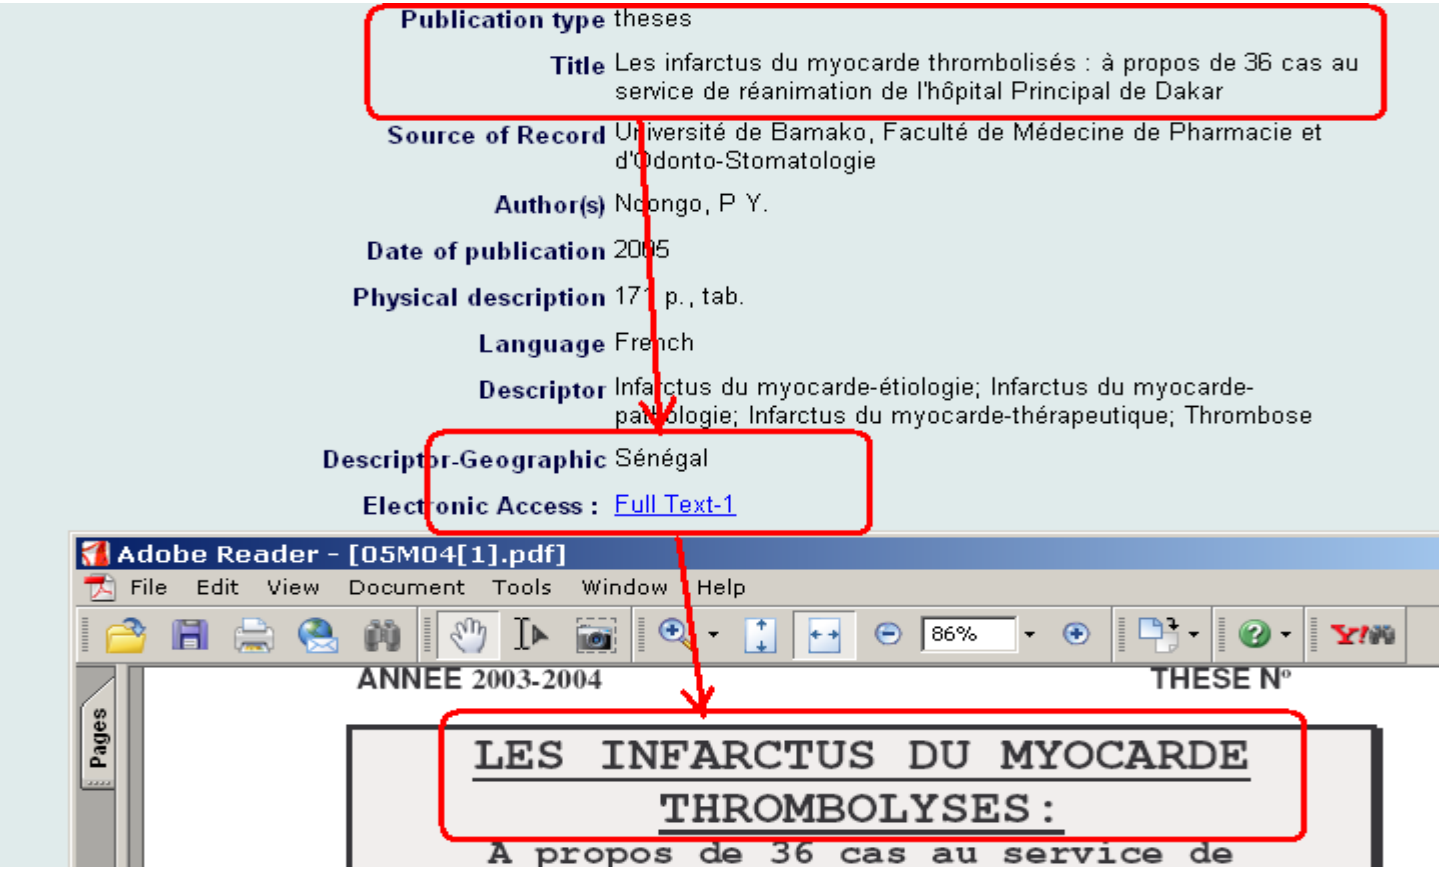
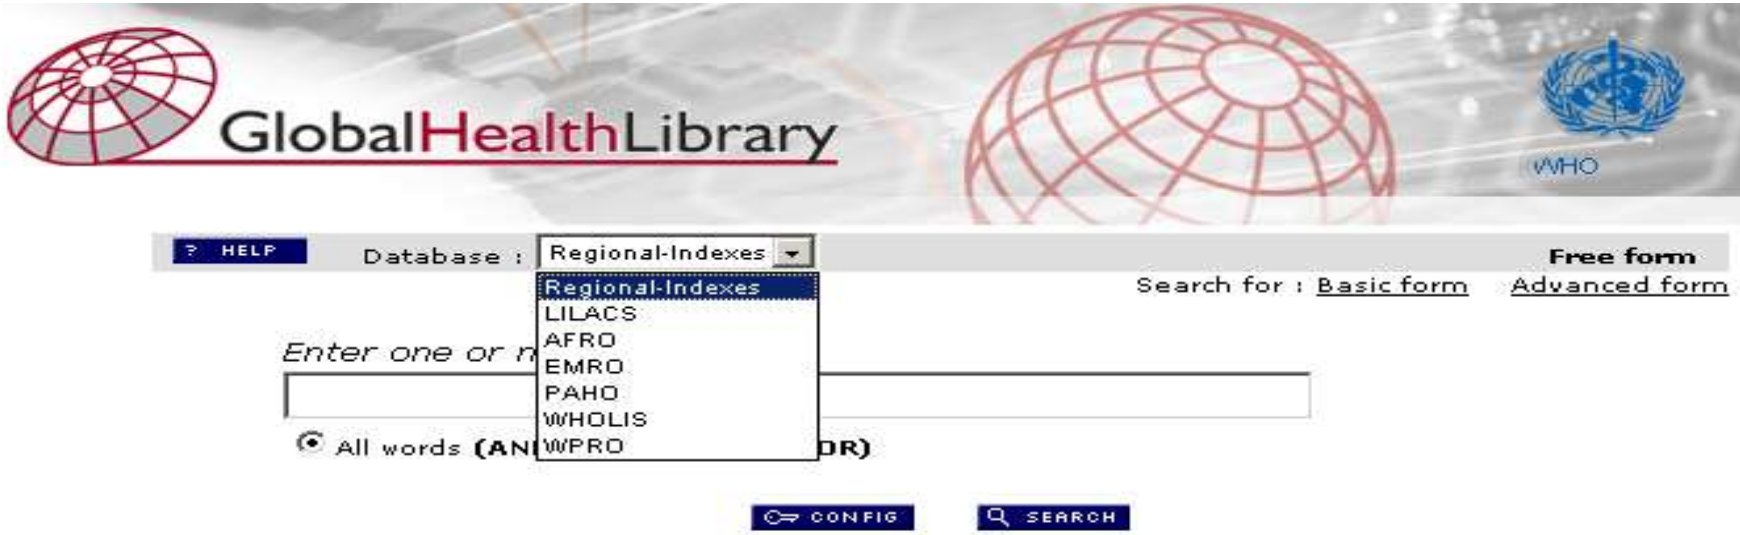
African Index Medicus
Index of African Health Literature



World Health Organization

New Global Index Medicus – 2010



Notes:

- This option recovers words of the title of the article, words of the abstract, name of substances, name of people as subject, and subject descriptors.
- Language of the search:

  - for searches in words of the title and words of the abstract, uses preferentially the languages Portuguese, Spanish or English, since the majority of the articles LILACS are in an of these languages. Example: colgajos quirúrgicos or skin flaps

WHO Reproductive Health Library (RHL)

"informing best practice in reproductive health"

- RHL is an electronic library developed 10 years ago in 1997 in the World Health Organization's programme to "Map Best Reproductive Health Practices" (http://apps.who.int/rhl/en/) - Free for developing countries via the Internet or on CDROM
- a well-established resource enabling health care workers worldwide to keep up-to-date with the latest evidence in reproductive health and to view videos showing techniques in real life settings
- the full contents of currently more than134 of clinical decision-making systematic reviews mainly from the Cochrane Collaboration (well-known for its high standard and independence)
